

OPIOID EPIDEMIC

The SPEAKER pro tempore. The Chair recognizes the gentlewoman from Missouri (Mrs. WAGNER) for 5 minutes.

Mrs. WAGNER. Mr. Speaker, the world is an ugly place right now. It seems that at every turn there is another crisis—another barrier to peace and prosperity, another obstacle to fight, or another cross to bear. More of our citizens, women, children, and grandkids are turning to something—anything—to mute the pain and create a false sense of peace. Society has been infected by drug addiction, a disease fueled by a loss of hope.

We see it on the news, we watch it online, we feel loss in our communities. This disease is killing our friends and neighbors. Last year alone, over 64,000 lives were lost. That is more casualties in a year than we saw during the height of the Vietnam war.

And this is a war, too—a war being fought in the streets and in our homes. And we are losing. Mothers, sons, daughters, and fathers are dying—from the cold streets of major cities to the quiet fields of rural America—we are all feeling the effects of the opioid crisis.

What can be done? That is a question I have asked countless law enforcement officials, doctors, nurses, addiction treatment professionals, and community leaders. There is no one solution to stopping the opioid epidemic in this country.

This is a man-made disaster. We must face it head on with education and awareness, addiction and recovery services, funding, prescription drug monitoring programs, and prevention. We need to prevent our loved ones from being dragged into the abyss of addiction and hopelessness.

According to the CDC, three out of four new heroin users report abusing prescription opioids before using heroin. There is an easy step each of us can take to help with prevention. We can get rid of our old opioid prescriptions at home. Why chance someone taking them? Why chance your loved one being a statistic?

This year alone, 153 individuals in St. Louis County have already died of an overdose. How many of them started with prescribed opioids? How many started by taking prescriptions from a parent or a family member? If we could have saved just one of these lives by throwing away old prescriptions, then isn't it worth it?

This Saturday, October 28, local law enforcement and the Drug Enforcement Agency will be set up all around the country and in our neighborhoods for National Prescription Drug Take Back Day. They are providing safe and easy locations for you to throw away unused prescription drugs.

I have no idea how many people can, and will, be saved by this one simple act. But multiply this one act times thousands, and now we are getting something done. Mr. Speaker, this is an epidemic this Nation has never seen. This is a disease of our own making.

This week, there is something we all can do. Think about your household. Go into your hidden cupboards and see if you have old prescriptions. I bet you do. Take them. Find your nearest drug take back location and throw them away.

We need to restore hope in this fight, and it won't happen overnight. It will take work, prayer, patience, and vigilance. Hope can be restored. If and when we band together to fight this epidemic, it will happen.

So let's restore a little hope this week. Let's all join the fight to end the opioid epidemic.

THE WHITEFISH ENERGY DEAL

The SPEAKER pro tempore. The Chair recognizes the gentleman from Illinois (Mr. GUTIÉRREZ) for 5 minutes.

Mr. GUTIÉRREZ. Mr. Speaker, there is something fishy about the Whitefish Energy deal that was reported in *The Washington Post*.

Whitefish Energy, based in Whitefish, Montana, was awarded a \$300 million contract to repair and replace the electrical grid in Puerto Rico. We learned that the company is 2 years old and, as of about 6 weeks ago, had just two employees. It does not have a track record of working on massive projects, certainly not one as massive as rebuilding the power grid in Puerto Rico after a once-in-a-century storm like Hurricane Maria.

The Puerto Rico Electric Power Authority did not solicit bids for this contract. They did not do what most power utilities do under these circumstances, which is rely on mutual assistant relationships with other power companies.

In Florida and in Texas—and in Illinois, for that matter—after a big storm, power companies from around the country send linemen and other workers to assist the local company. But that is not happening here. The Florida Power and Light Company brought in 20,000 workers after Irma and, apparently, was willing to send workers to Puerto Rico and help, but the request for help never came.

So what is going on here?

A tiny company that does not have a track record gets one of the biggest contracts to help rebuild Puerto Rico in a no-bid, out-of-the-ordinary contracting procedure.

That is why I wrote yesterday to Attorney General Jeff Sessions and FBI Director Christopher Wray, because I want them to investigate this deal, how it was awarded, why this company got the contract, and whether there is any evidence of it being a sweetheart, corrupt deal to boost business allies and political allies of the President and members of his Cabinet.

I also plan to bring this issue up to the Oversight Committees in this body.

On the surface, the Whitefish Energy deal looks fishy, but when you look a little deeper, the Whitefish Energy deal looks corrupt.

Whitefish Energy is based in Whitefish, Montana. Guess what. That is the hometown of Interior Secretary Ryan Zinke, who used to represent Montana in this body. His son even worked for the company. The chief executive of Whitefish Energy, Andy Techmanski, knows Secretary Zinke; but as a spokesperson for the Interior Department said yesterday, in Whitefish, "everybody knows everybody."

Guess what. That doesn't make me feel any better about the deal.

Go a little deeper and you find out that Whitefish Energy is financed by HBC Investments, which is a private equity firm founded by Joe Colonnetta, who holds the title of general partner.

The *Daily Beast* reported that Colonnetta gave \$20,000 to the Trump Victory PAC, maxed out on contributions to Trump for his Presidential campaign in the primaries and general elections, about \$32,000, then another \$30,000 that he gave to the Republican National Committee. Kimberly Colonnetta, his wife, was also a maximum donor, meaning she gave the maximum allowed by law during the 2016 election to Trump and his various committees.

Now, please look here, and the pictures are right off the Internet. They certainly add additional evidence to the idea that Whitefish and the Colonnettas are pretty chummy with our President and his Cabinet. Right here is Mr. Colonnetta with the President of the United States, the two Colonnettas at the inauguration, and a picture of Mrs. Colonnetta with Ben Carson, one of the President's Cabinet members.

Don't forget, all you kids out there watching at home on C-SPAN, what you post on Facebook stays there forever.

Now, I know that not everything that looks corruption is in fact corruption. Sometimes what looks fishy on the surface turns out to be legit, but most of the time, you know what, it turns out to be corruption.

The reason this matters so much is that, without electricity, we can't get water restored to the people of Puerto Rico. Water doesn't flow uphill without pumps, and those pumps need power. You cannot live without water; you die. Dialysis machines, electrical wheelchairs, refrigeration for baby formula, insulin for diabetics, chemotherapy for those with cancer all require electricity. It is a matter of life and death.

I was just there and saw the suffering of the people in the villages and towns across the island of Puerto Rico. Without electricity, we cannot get Puerto Ricans back to work rebuilding their island and beginning to end the suffering.

Look, the last thing we and the people of Puerto Rico need right now is a fat cat lining his pockets with money because they are well connected.

The SPEAKER pro tempore. The time of the gentleman has expired.
